## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

**2. Claims 1-16 rejected under 35 U.S.C. 102(e) as being anticipated by Yost et al., Patent #6,154,766.**

Regarding claims 1 and 9, Yost teaches a system and method for generating an active voice page to deliver voice services to a user, the active voice page comprising at least one markup language document(col.12 lines 3-5), the system and method comprising:

an input module that receives data reports and a structure for a voice service;

a markup language converting module that converts the data reports and the structure into a markup language (14, 24 and 40c of Fig.1, col.8 lines 24-32, col.11 lines 45-

*col.12 line 5 ,col.14 lines 10-29, and col.15 lines 18-21; the server system in Yost generates data reports from the data warehouse including the data structure to provide the user with voice services through a user device); and, a blending module for blending the converted data reports and the converted structure into an active voice page (col.8 lines 24-32, col.8 line 55-col.9 line 11, and col.11 lines 65-col.12 line 5 and col.17 lines 20-23; the system in Yost can convert data reports and structure from the data warehouse into an active voice page for the user to listen to via a mobile telephone).*

Regarding claims 2 and 10, Yost teaches the system and method of claims 1 and 9, wherein the markup language is extensible markup language (col.12 lines 3-5).

Regarding claims 3 and 11, Yost teaches the system and method of claims 1 and 9, wherein the markup language is TML (*col.12 lines 3-5; HTML is a version of TML used for web pages*).

Regarding claims 4 and 12, Yost teaches the system and method of claims 1 and 9, wherein the data reports are online analytical processing system reports (col.4 lines 4-10).

Regarding claims 5 and 13, Yost teaches the system and method of claims 1 and 9, wherein the markup language converting module comprises a markup language generator that receives the structure and generates a markup language document from the structure (*14 Fig.1 and col.11 line 45-col.12 line 5; Yost uses the data structure from the data warehouse to generate a markup language to provide the audio output necessary if requested by the user*).

Regarding claims 6 and 14, Yost teaches the system and method of claims 1 and 9, wherein the markup language converting module comprises a markup language transforming module that receives data reports from the input module and transforms the data reports into markup language documents (*14 Fig.1 and col.11 line 45-col.12 line 5; Yost uses the data reports from the data warehouse to generate a markup language to provide the audio output chosen*).

Regarding claims 7 and 15, Yost teaches the system and method of claims 6 and 14, wherein the markup language transforming module receives stylesheets from the input module and transforms the data reports into markup language documents using the stylesheets (col.9 lines 3-11).

Regarding claims 8 and 16, Yost teaches the system and method of claims 1 and 9 further comprising a module for generating a call request that receives the active voice page and one or more style properties that are unique to a user and generates a call request for the user (20 Fig.1 and col.17 lines 20-23).

### ***Conclusion***

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Uppaluru, Patent #5,915,001 teaches a system and method for providing and using universally accessible voice and speech data files.

Rhie teaches a method and apparatus for telephonically accessing and navigating the internet.
